Spraying Trees.

WE ARE EQUIPPED with a modern double power sprayer, and are fully able to spray successfully against San Jose Scale, White Aphis, Elmbeetle, etc. Accompanying pictures show our men in action in a badly run down orchard near Poughkeepsie.

In order to do satisfactory work spraying against San Jose Scale should be done after pruning and scraping the trees.

Pruning old fruit trees can be done any nice day during winter, beginning November and not later than March.

Spraying can be done at the same time, but care should be taken not to spray when there is a frost.

Estimates on pruning and spraying cheerfully given.

Our pruners just commencing to prune in a badly run-down apple orchard. Notice the many dead limbs; consequently suckers have come in, and the thick growth prevents the sun and air from doing their important work.

The trimming is nearing completion. The brush will be gathered and burned, the ground plowed and fertilized. Within two years this orchard, though many years old, will give splendid returns, and the money invested for trimming and cleaning is well spent. What we can do for an entire orchard we can do for one tree.

This tree is properly pruned and scraped and ready to receive a thorough lime and sulphur spray.
The picture shows our double-acting Gould sprayer at work.

Our Landscape Department

IS ALWAYS READY to give you the best suggestions for planting and improving your grounds. Our many years of experience in practical landscape work enables us to give good sound advice as to how to plant and what to plant. We are well stocked with fine trees, shrubs, evergreens, etc., and it is just the right selection of these which make for beautiful gardens. Half-hardy shrubs or shrubs planted in the wrong place or varieties apt to get San Jose scale and other diseases will make for sure failure.

No garden too small for us to give advice freely.

We prepare detailed plans or sketches with accompanying specifications giving the names and numbers and cost of trees, shrubs, etc., to give the desired results.

Do not wait until spring is at hand. Write us early, you will get better satisfaction.

Visitors are always welcome in our nurseries.

Yours respectfully,

SUNNYFIELD NURSERY CO.,

College Ave.,

Poughkeepsie, N. Y.

White flowering Dogwood—One of the best native trees; very conspicuous in spring. We offer young handsome trees.

BEAUTIFUL HARDY FLOWERING TREES.

Specially grown on standards.

These trees (Dogwood, Magnolia and Horsechestnut excepted) do not grow large but remain handsome little trees for the lawn and garden with plenty of flowers.

Red flowering Horsechestnut,

Produces fine spikes of dark red flowers in May,
on standards, 6-8 ft. \$2.50 each

Wisteria,

Grown on strong, straight stems, specimen 2-3 ft. \$2.50 each

Pterostyrax hispida.

In June it bears long racemes of pure white flowers similar to the Wisteria, young trees, 5-6 ft. \$1.50 each

Judas tree,

Grown in tree shape, handsome young trees,
5-6 ft. \$1.50 each

Tree Andromeda, Oxydendron arboreum,

Lily of the Valley-like flowers in profusion during July and August, when flowering trees are rare. Glossy green foliage which turns to a brilliant red in the fall. Young trees, 5-6 ft. \$1.50 each

Robinia Hispida, Moss Locust,

Grafted on handsome standards, large trusses of beautiful pink flowers in spring and late summer, 5-6 ft. \$2.00 each
6-8 ft. 3.00 "

Standard Hydrangeas,

Fine trees 3½-4 ft. @ \$1.00 each
extra 4-5 ft. @ 1.25 "

Magnolias,

Splendid pyramid trees with a firm ball of earth:
